SIRE 2.0

SIRE 2.0 Familiarisation

Course Description:

This course is designed to introduce senior officers on board tanker vessels to the new OCIMF inspection system under SIRE 2.0. It provides participants with the knowledge and understanding required to prepare for and comply with the updated inspection regime.

Course Objectives:

- Understand the new vision and strategy of OCIMF.
- Become familiar with SIRE 2.0 terms and terminology.
- Learn the structure of CVIQ, including question types, guidance, and the risk-based approach.
- Identify observation categories and apply inspection guidance.
- Recognize the human-based approach and performance influencing factors.
- Gain practical knowledge of the inspection process, including use of the tablet.

Guidelines:

- OCIMF guidance, instructions, and questionnaires
- Feedback from vessels
- Inspection reports

Entry Standards:

- Masters
- Chief Officers
- Chief Engineers
- Second Engineers

Certification:

- Certificate of Attendance issued upon successful completion of all tests and exercises.

Facilities:

- Virtual classroom (via Zoom)

Course Duration:

- 2 days (4 hours per day, total 8 hours)

Assessment:

- Final Test

Teaching Method:

- Online lectures, interactive workshops, instructional videos, and facilitated discussions

Venue:

- This course is delivered online on a regular basis by the Company's Training Manager. For upcoming schedules, please contact the Training Department at crewtraining@zolarship.com
